Sherrill Rosoff asked the committee members for any comments. Harvey Serreze, last night at the CEN night presentation Jessica Vesey asked the question about what is a luminaire, we should just say its a lighting fixture; also difference between kelvin and lumens. We should keep it simple. We have to hammer to the audience is that they don't have to do anything. Mark Little suggested that this is not an onerous bylaw and that we are just trying to prevent the light pollution in the town from getting worse.
